I am HOLD on both '29 and '31 going into the 2Q'22 Earnings Call.

YTW is >8.5% or about 50bps above HY market. Which is attractive on the surface provided very low leverage and LTV metrics.

**INVESTMENT RATIONALE** 

However, I do expect announcement of further operational weakness. That could put even more technical pressure on the notes. With further negative revisions the credit could trade lower toward double digit territory.

- I would like to see how much progress the company is making on decreasing its Inventory levels.
- Upon further weakness in the trading levels, GPS notes could be upgraded to BUY later in August September timeframe.
- Overall leverage and LTV here are very manageable (sub 1.5x Net Leverage and 25%). '23 EBITDA multiples on stressed companies seem to be centering around 3.0 to 4.5x. Hence GPS leverage implied no impairment to the notes.
- There is structural coverage (though not collateralized) from RE portfolio assets coupled with profitable Athleta and Banana Republic retailing brands. **Ownership has proven to be conservative regarding leverage policy.**
- Long term, I can see return of success to Old Navy brand. It is a great value proposition and should do well attracting middle-income buyers looking to save in tougher economic times. Credit has plentiful liquidity to sustain itself as it is dealing with resolving current issues.

#### **NOTES**

#### **INVESTMENT THESIS**

7/30/22

I am HOLD on both '29 and '31 going into the 2Q'22 Earnings Call. I do expect announcement of further operational weakness. That could put even more technical pressure on the notes. With further negative revisions the credit could trade lower toward double digit territory.

- However, I would like to see how much progress the company is making on decreasing its Inventory levels.
- Upon further weakness in the trading levels, GPS notes could be upgraded to BUY later in August -September timeframe.
- Overall leverage and LTV here are very manageable (sub 1.5x Net Leverage and 25%). '23 EBITDA multiples on stressed companies seem to be centering around 3.0 to 4.5x. Hence GPS leverage implied no impairment to the notes.
- There is structural coverage (though not collateralized) from RE portfolio assets coupled with profitable Athleta and Banana Republic retailing brands. Ownership has proven to be conservative regarding leverage policy.
- Long term, I can see return of success to Old Navy brand. It is a great value proposition and should do well attracting middle-income buyers looking to save in tougher economic times.

Credit has plentiful liquidity to sustain itself as it is dealing with resolving current issues.

#### **FUNDAMENTAL BASIS FOR CONCLUSION:**

Highly negative operating sentiment. It seems GPS made a huge strategic mistake at exactly the wrong time. Previous CEO and senior management team invested heavily in inventory (up 25-35%) from previous year's highs. The strategy is getting slammed in 3 different ways:

- 1) Styles ordered are not in consumer demand (stay at home / active leisure vs going out). Sentiment shifted and GSP missed it. Now stock with inventory which would have to be sold at tiny to zero margins.
- 2) Bodequality great ESG initiative proven to be hard to execute... SKU count is through the roof, but the consumer they are seeking did not show up.
- 3) Low-end consumer is feeling the pinch of inflation in every day life. Tightening of belts means trimming down on clothes purchases.

Also it is too early for a step-down consumer from higher price points to show up.

Hence GSP is entering a very challenging operating environment. Sales should under pressure.

- Former CEO (fired a few weeks ago) had a terrifying anecdote about two different stores with \$50k and \$100k customer demographics.
- Carter's came out with (8%) sales comp in 2Q and negative outlook based weakening consumer sentiment.
- VF Corp is showing great numbers in North Face, Timberland and Vans... but negative comps in Dickies... singling out low-income consumer's weakness.
- Seems fair to expect another revision down in 2Q EC.

However, the notes are in low 70's already. YTW is >8.5% or about 100bps above HY market.

Some structural **credit** support counter-balances operational negativity:

- The company spent heavily on inventory. At 1QE'22 inventory was at record high levels a whopping 34% above Apr'21 levels. That's \$800m!!! Over next 18 months inventory levels should be brought down significantly. Hence Working Capital will be net source of cash.
- Should be sufficient to overcome negative cash flow from EBITDA less CapX and IntX
- GPS ownership proved prudent in its capital allocation policy. Cut cash to shareholders entirely in all 4Q's of 2020. I'd expect the same should operating environment begin to resemble my Worst case scenario.
- Co' owns over \$1bn on RE and is ready to liquidate it to supplement cash flow needs.
- Liquidity is ample base on cash levels and RC availability.
- Athleta and Banana Republic are smaller but well-functioning brands. Monetization is an option... though only theoretically.

# CRI & VFC 2Q'22 EC update

7/29/22

# CRI, 2Q'22 Earnings Call; 7/29/22

- In addition to slow start in April (retail sales down 1%), sales weakened in May and June.
- Correlating to consumer confidence. Inflation of gas prices was sited first. Retail sales were down 8%!!!
- Unlike GPS they are planning on margin expansion. Prices increases have been successful and cost (freight) have been coming down.

# VFC, 2Q'22 Earnings Call, 7/29/22

- Timberland and North Face have shown 11% and 14% growth in all geographies outside of China.
- But Dickies was down 13% reflecting contracting low-end consumer in the Americas (!!!)

# NET WORKING CAPITAL

7/29/22

- Typically The Gap is spending NWC on inventory in 1Q (ahead of spring/summer) and 3Q (ahead of holidays);
- Similarly, The Gap is selling the inventory and raising NWC in 2Q (spring/summer) and 4Q (holidays shopping);
- However in 4Q'21 and 1Q'22 GPS was amassing inventory: up 23% and 34% (nothing seen in last 6 years). Hence 4Q'21 NWC was a slight use of capital while 3Q'21 and 1Q'22 were huge uses of capital.
- The  $\operatorname{co}'$  is bound to discount existing inventory for remainder of the year.
  - For the year, I's expect NWC to be a use of capital... but potentially

# SELLSIDE SOURCE #4 (HY)

7/29/2022

# Comps:

- HY Comps: Abercrombie; Bath Body Works; Foot Locker; Rent-a-Center
- Rent: use EBITDAR vs Debt + Leases
- VFC & CRI just reported showing weakness from the consumer

# **Capital Structure:**

- Downside on the notes is protected by RE ownership and Athleta's valuation.
- Fisher family (owns 40% of GPS) has historically been very conservative with balance sheet.
- In '20 refi'd existing '21 notes with Sr Secured debt by providing liens on IP and real estate
- RC: yes, it does have some sort of ABL borrowing formula

# Liquidity:

- Trading: very few incremental buyers... HF's are playing this via CDS.

#### **NOTES**

#### **SELL-SIDE SOURCE #6 (equity)**

7/13/2022

- 1) Low Visibility re: recovery at Old Navy
- 2) Elevated promotional environment negative impact on margins at Gap & Old Navy
- 3) Further risk to 2H'22 numbers / guidance
- 4) C-suit changes add to near term uncertainty.
- Old Navy visibility is pushed out to spring '23 (new lineup arrival)
- Longer then average transit times
- Lower then anticipated demand in active / fleece / kids & baby
- BODEQUALITY: Old Navy extended size initiative
- 2Q'22 sales to be up but due to promotions!
- GPM in 2Q'22 down 905bps. It was down 930bps in 1Q'22
- Valuation: EV/EBITDA 4.0x on '23 EBITDA \$978mm (vs prior est

\$1,161mm vs street est \$1,026mm) = \$9/sh

#### **SELLSIDE SOURCE #5 (equity)**

7/11/2022

Announce c-suit changes

Downgraded guidance: inline w street expectations: down 9%, adjoin margin zero to slightly negative (street +3%).

- 1) Mngt is siting: more aggressive approach to assortment balancing. Result: increased promotion activity!!!
  - $2Q^{\prime}22$  sales decline in double-digits. Problem in Old Navy:
  - not increase in demand since new product has arrived!!!
     Sharp consumer shift into fashion/dress-up categories.
  - Consumer discretionary spend is squeezed by inflation.
  - New fashion designs won't hit the stores until 1Q'23
  - Inventories are building: will require aggressive promotions!!! Margins will decrease.
  - Getting this message from URBN (urban outfitters), M

(Macy's), AEO (American Eagle), GPS

- 2) Increased promos + airfreight & raw materials inflation:
  - \$50m increased airfreight costs
  - 2Q'22 gross margin could be down 910bps from to 34.2% (!!!)
  - EBIT margins should be zero! Everyone has taken down their expectations.
  - More risk for markdowns to move the inventory hence more risk of margin compression in 2H'22

Valuation: 4x'23 EV/EBITDA = 3x for Old Navy / Banana / Gap + 8x for Athleta Equity = \$5/sh!

### **SELLSIDE SOURCE #4 (HY)**

7/11/2022

- $\,$  CEO, Sonia Syngal (former Old Navy CEO), leaving after 18 years at the company.
- 2Q guidance is revised down
- FYE'22 leverage 2.5-3.0x

### Co's issues:

- 65% miss on execution (Old Navy)... \$250M air freight; 4Q'21

assortment miss in Old Navy.

- 35% lower-end consumer weakness... could be getting worse
- Supply chain is 6 mo's or longer: no improvement until '23
- New CEO for Old Navy, Horatio Berbeito, x-CEO OF Walmart Canada.
- Board Chairman, Bob Martin, is interim CEO X-Dillards, Walmart Intl;

# INDUSTRY EXPERT VIA ThirdBridge

6/10/2022 Ben Stefacic (former SVP & CFO, Global Supply Chain Ops at The Gap Inc)

Key Takeaways:

- 1) Negative growth in all but BR brands!
- 2) Old Navy has had a product problem for at least 3 quarters... only now it is being acknowledged.
- 3) Old Navy does 700mm units a year supply chain gets very delicate 4) Whenever Old Navy has inventory problem it becomes ugly really
- fast. Can only mark down to get rid off it.
- Inflation is a huge problem: squeezing retailer from every direction: raw materials, transportation, wages... all the while apparel has been in deflationary environment for a long time.
- Retail apparel is a negative growth story in '22 but reversion to the mean in '23-26 of 2-4%... investors should have been cautious of inventory levels this year.
- Gap will do worse than others in '22. They planned for aggressive '22 and stacked up. 34% inventory comp at 1QE'22.
- It'll take at least through '22 to work through it... only via promotions.
- Why? Management was arrogant to think '21 will be repeated and lapped. Senior team not listening to their people on the ground.
- Old Navy runs 75% of units of all of Gap Inc.
- Athleta has greatly benefited from staying at home trend. Lulu is still doing very well... Athleta is showing negative growth but it should reverse.
- Old Navy been explained already. Bodequality added to the problem with increasing SKU's. Women's line was completely wrong. Gave example a brand new store in Hawaii in 6 mo's entire women's line went on clearance. Nancy Green firing scape goat.
- Old Navy's problem: women's line is not compelling. Hence when mom is going to shop for the kids and a little bit for herself... she won't want to go back there.

- Gap struggling for last 15 years. Launched home line w Walmart... who is a discount retailer. Gap lost its way.
- Banana Republic benefiting from people being sick of staying home (same as Nordstrom and Macy's). Hired former exec from Restoration Hardware. Found a unique look. Cut back inventory (mb cut SKU's JL)
- Problem with moving not sold items to off-price retailers (TJX or Ross)... you can do that with Gap/Banana... problem w Old Navy is you can't move 100,000 units... you need to move 10 million! Reverse logistics is also a nightmare... so instead GPS just puts it on clearance and sells it close to cost.
- Old Navy's peers: Walmart, Target, Costco (latter does \$7bn in apparel). All are struggling with inflation and weakening demand from value-driven and low income bracket consumer.
- Consumer with under \$50k income will ask "what am I spending my money on?... period."
- Gap moved production to Vietnam from China over last 10 years.
- Best case: low demand will drive restructuring... SG&A is overinflated and needs to be cut. But management team is not focused on this at all.
- Worst case: inflation will continue... especially on raw materials, wages (at stores, distribution centers, corporate). Spring lockdowns in China will play a role in product availability in 2H'22.

# SELLSIDE SOURCE #3 (equity)

6/8/2022

- Mix shift toward Old Navy and Athleta should improve margin structure
- Old Navy: >50% of revenue and even more profits (higher margin!!!)
- Athleta is not large enough to drive investment case.

#### **NOTES**

### SELLSIDE SOURCE #2 (equity)

5/30/2022

- Gap brand seeing pressure in Asia (lockdowns)
- Supply chain / raw material costs inflation
- Old Navy turnaround execution
- Lower income consumer is struggling
- Shift in demand toward going out categories vs athleisure / active
- Promotional levels are increasing
- Banana Republic comps up 27% as brand change is working
- Athleta near term shift in demand
- Searching for new Old Navy leadership

#### **EARNINGS CALL, 1Q'22**

5/26/2022

Sonia Sygnal, CEO; Katrina O'Connell, CFO

- Underperformed expectations for Q1 and took guidance down for '22
- Sales of \$3.5bn down 13% YoY, due to Old Navy, down 19%; Athleta comp sales down 7%. Gap down 11%. BR comp sales up 27%. Instore sales down 10%, online sales down 17%.
- Gross Margin 31.5% ("deleveraging" 930bps... what is that? Window dressing verbiage for worsening margins???) \$170m of incremental air freight was 480 bps.
- Merchandise Margins down 760bps... 280 due to discounting at Old Navy.
- SG&A \$1.3bn or 37.2% of sales
- Old Navy weakness will have negative impact on '22 EPS by  $1/\sinh$  due to:
  - Soft demand in active, fleece, kids & baby. Consumer pivoted to dresses and tops (these are underrepresented in Old Navy's women's line mix). When product did arrive "there is an acceptance issue". Invested in Bodequality... overestimated that demand in stores.
  - Inflation is impacting costs fuel costs, labor. Also inflation impacted lower-income consumer's demand. Cutting down growth expectations as a result.
  - Gap slowdown in Asia due to COVID related shutdowns.

- Seen improved trends in May. But taking more conservative view on low-income consumer to guide down for '22.
- Two stores: \$100k vs \$50k consumer... the former showed no effect, the latter had baskets down, cash frequency down!!!!!

### Capital Usage:

- paid \$0.15/sh dividend and repurchased 3.7m shares... for \$110m. 2Q'22 divie: \$0.15/sh
- Inventory: up 34% YoY
- OCF: (\$362m); FCF (\$590m) well worse then historic norms.
- Sold Mission Bay property in SF for \$330m + \$428m in NOL carryback tax refunds on CARES Act.

#### '22 Guidance:

- Sales down low-mid single digits.
- Gross Margin: 36.5-37.5%.
- Operating Margin: 1.8% 2.8%; adj Operating Margin 1.5% 2.5%;
- IntX \$80m;
- Taxes 27%

### **SELLSIDE SOURCE #1 (HY)**

3/4/2022

#### '22 Guidance:

- Co' expected 20-25% lower air freight expenses (pressured margins in '21).
- LSD sales growth
- Management expected 1Q TO be soft and turn around thereafter (clearly which never happened JL)
- Old Navy: '21 sales flat to '19. 1H'22 continued weakness. Miss on dresses and tops as consumers pivoted way from casualwear/athleisure.
- Gap: global '21 sales up 3% from '19, US +12%
- Banana Republic comp sales down -2% vs '19. Should improve to more high end rebranding.
- Athleta comp sales up 42%. On track to reach \$2bn in '23.
- Supply chain disruptions persist. '21 air freight costs: \$430mm... '22 should be >\$300mm...

### Capital allocation:

- CapX \$700M
- Dividend is increasing (1Q'22 up 25% from 4Q'21)
- GPS paid \$400m to shareholders!
- Will open 30-40 stores (Old Navy / Athleta)
- Will close 50-60 stores (Gap / Banana part of 350 store closure plan)
- Diversifying from port concentration on west coast: south and eastern seaboard.
- Lockdowns in China impacting Gap's performance.

# Classification of Expenses

# COGS & Occupancy X:

- cost of merchandise
- inventory shortage & valuation adj
- freight charges
- online shipping and packaging costs;
- cost assoc w sourcing
- gains & losses associated FX derivatives for hedging

# OpX:

- payroll, benefits, admin for store ops, field mngt, distribution centers;
- payroll, benefits, admin for corp functions, marketing, design and development;
- IT expenses;
- lease less sepreciation on corporate offices;
- R&D;
- gains/losses on FX derivatives not for hedging
- third party credit card processing;
